

USER GUIDE

Measure roofs. Send reports.

Everything you need to measure a roof from the satellite and hand the homeowner a professional report — from your phone.

CONTENTS

What's in this guide

- 1** **Getting started**
Create your account, confirm your email, sign in, use it on your phone
- 2** **Set up your reports**
Your logo, your prices and your language
- 3** **Measure a roof**
Find the address, check the outline, mark solar panels and turbines
- 4** **Read your report**
What each page of the PDF tells you and what the warnings mean
- 5** **My Reports**
Find, download, share and delete your reports
- 6** **Credits & purchases**
How credits work, packs, the unlimited plan
- 7** **Questions & help**
Common questions and how to reach us

How QuickSquares works, in three steps

1. Type the property address. 2. Check the roof outline on the satellite photo. 3. Download a PDF with squares, pitch, materials and your estimate.

CHAPTER 1

Getting started

Your account is free to create and comes with 5 free roof reports. No card needed.

Create your account

- 1 Go to **quicksquares.spurreport.com** and tap **Start free**.
- 2 Fill in **Company name**, **Your name**, **Email**, **Phone** and a **Password** (at least 12 characters). Your company name is shown on every report you give to homeowners.
- 3 Accept the Terms of Use and Privacy Policy, then tap **Create my free account**.
- 4 Open the email we send you and tap the link. On the page that opens, tap **Confirm my email** — your **5 free reports** are added right after.

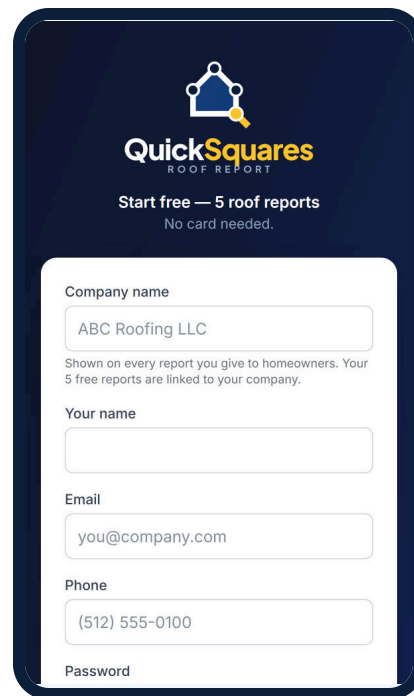

No email?

Check your spam folder, or wait a minute. The link works for a limited time.

"You already have an account"

If we set up your account for you from one of our emails, tap

Set my password to choose your password — your free reports are waiting.

A screenshot of a mobile app sign-up form for 'QuickSquares ROOF REPORT'. The form is dark-themed with white text and input fields. At the top, there's a logo and the text 'Start free — 5 roof reports' and 'No card needed.'. Below that, the form fields are: 'Company name' (with 'ABC Roofing LLC' entered), 'Your name', 'Email' (with 'you@company.com' entered), 'Phone' (with '(512) 555-0100' entered), and 'Password'. A small note below the company name says 'Shown on every report you give to homeowners. Your 5 free reports are linked to your company.'

The sign-up form

Sign in and forgotten password

Sign in with your email and password. If you forget your password, tap **Forgot password?**, enter your email and we will send you a link to choose a new one.

Using QuickSquares on your phone

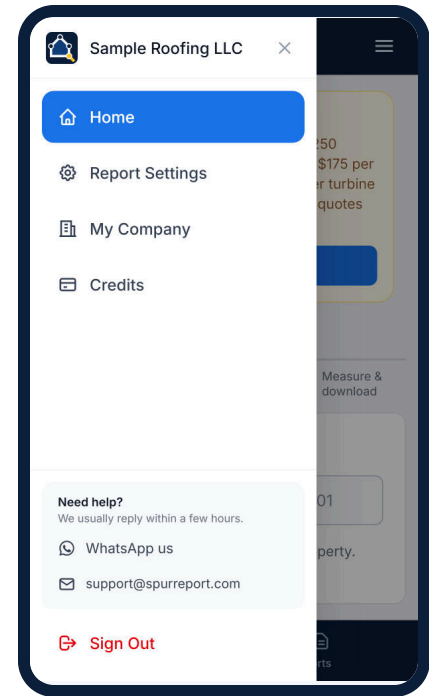

QuickSquares is made for the job site. On your phone:

- The **bottom bar** has the two things you use every day: **Measure** and **Reports**.
- Tap the **menu (≡)** at the top to open everything else: Home, Report Settings, My Company, Credits, **WhatsApp us** and Sign Out.

Tip: put it on your home screen

In your phone's browser, use "Add to Home Screen". QuickSquares then opens like an app.

On a computer the same options appear in the side menu on the left.

The menu (≡)

CHAPTER 2

Set up your reports

Do this once, before your first report, so every PDF carries your logo and quotes the job your way.

Your logo

Open **My Company** from the menu, then tap **Upload logo** under Company Logo. Use a PNG or JPG under 2 MB. Your logo goes on every report.

Your prices

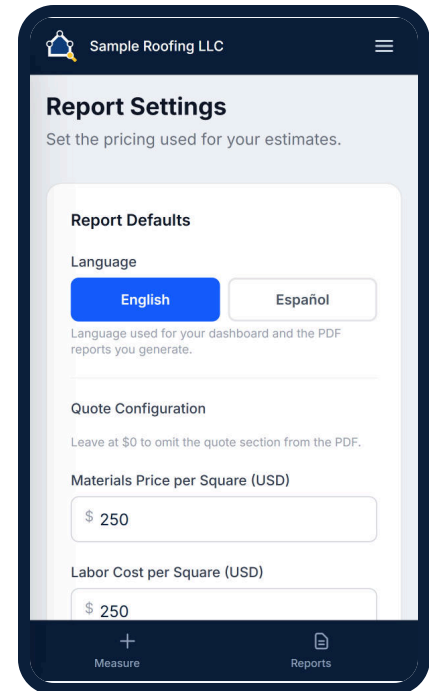

Open **Report Settings** from the menu. Until you set your own, estimates use starting prices. A yellow **"Set your prices"** box on the Home screen reminds you.

Price	Starting price
Materials, per square	\$250
Labor, per square	\$250
Solar panel detach & reset, per panel	\$175
Turbine vent replacement, each	\$120

Change them and tap **Save Settings**. **Leave a price at \$0** to leave the estimate section out of the PDF — useful if you only want measurements.

Language

Choose **English** or **Español**. It changes your dashboard and the PDF reports you generate.

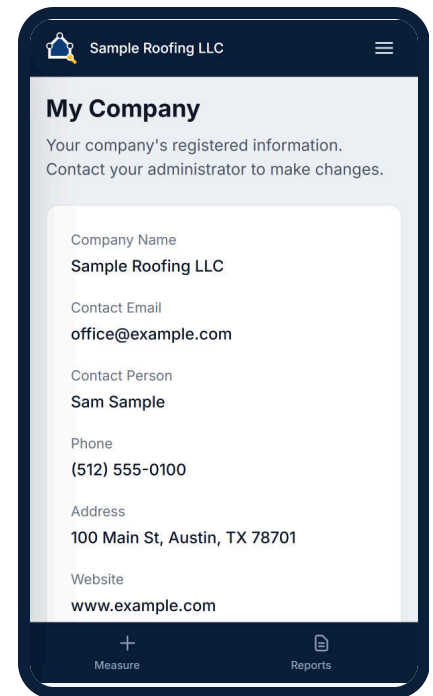

Report Settings

My Company

My Company shows your company's registered information: name, contact email, contact person, phone, address and website. It is shown for reference — to change any of it, contact us (see chapter 7). Your logo is the one thing you upload yourself, on this same screen.

The yellow “Set your prices” box

On the Home screen, tap **Set my prices** to go straight to Report Settings. The box goes away once you save your own prices.

My Company

CHAPTER 3

Measure a roof

Three steps: find the address, check the property, measure & download.

Step 1 — Find the address

- 1 Tap **Measure** in the bottom bar.
- 2 Start typing the **Property address** and pick it from the suggestions.
- 3 A satellite photo of the property appears. Check it is the right house.

Looking around is free

Searching and previewing addresses doesn't use any report credits.

Step 2 — Check the property

- **Homeowner** and **Email** are optional. If you fill them in, they show on the report.
- **Include nearby structures (garage, shed)** is off by default. Turn it on only if those small roofs are part of the job.

Tap **Measure Roof**.

Step 3 — Check the roof outline

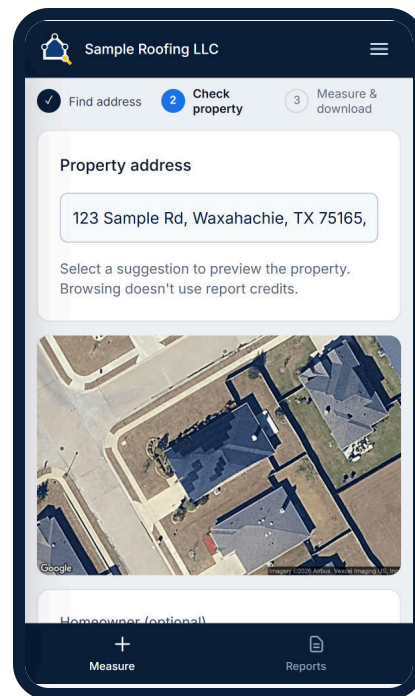

QuickSquares traces the roof on the satellite photo. Before generating the report, make it right:

- **Drag the white corners** to the roof edges.
- **Drag a small blue dot** to add a corner.
- **Leave out** metal patio covers and carports.
- **Stretch the outline** over parts hidden by trees.
- Pinch or use **+** **-** to zoom. **Undo** and **Reset outline** are there if you make a mistake.

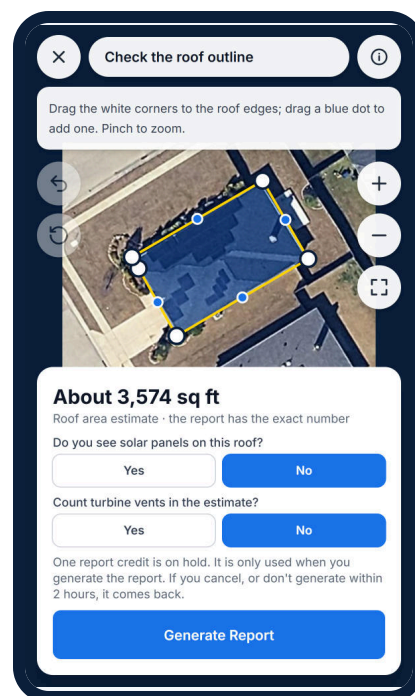

The box under the photo shows an area estimate ("About 2,400 sq ft"). The report has the exact number.

One credit is on hold

It is only used when you generate the report. If you tap **Cancel**, or don't generate within 2 hours, it comes back.

Satellite preview of the property

Drag the corners to the roof edges

Solar panels and turbine vents

"Do you see solar panels on this roof?" If yes, enter how many — or tap **Mark panels on the photo** and drag a box over each group of panels; QuickSquares counts about one panel per 17.6 sq ft. Correct the number if you know it. Then choose what happens with them:

- **Detach & reset** — adds your detach & reset price per panel to the estimate.
- **Deduct their area** — takes the panels' area off the shingles instead.

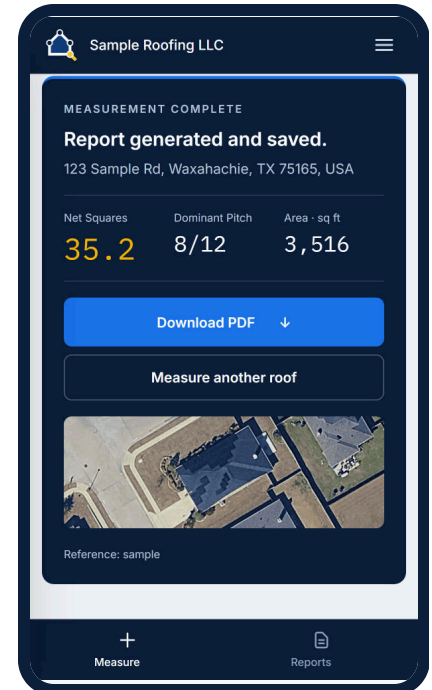

"Count turbine vents in the estimate?" If yes, enter how many; your turbine price is added for each one.

Generate and download

Tap **Generate Report**. In a few moments you see **Measurement complete** with net squares, dominant pitch and area. Tap **Download PDF** to open the report and share it with the homeowner. The report is also saved in **My Reports**.

Measured this address in the last 7 days?

Generating it again is free — no credit needed.

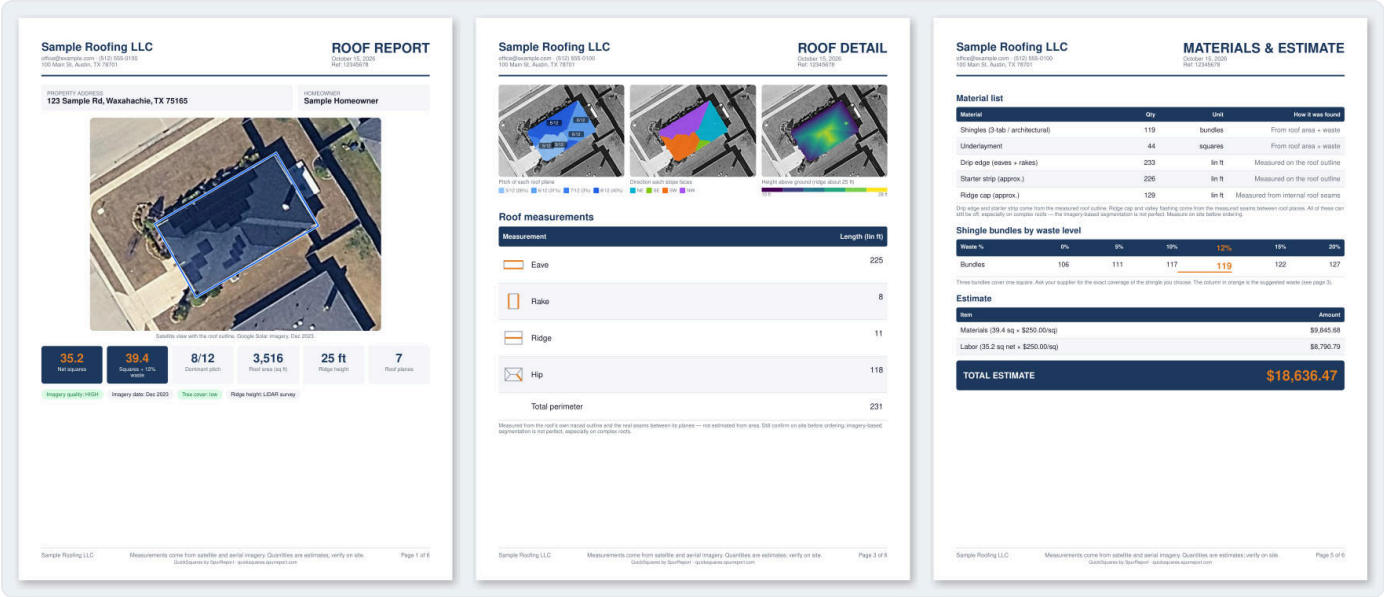

Measurement complete

CHAPTER 4

Read your report

A Letter-size PDF with your logo, ready to hand to the homeowner.

Section	What it shows
Cover	Property address, homeowner, satellite view with the roof outline. Net squares, squares + waste, dominant pitch, roof area, ridge height and number of roof planes.
Property images	Satellite close-up, a wider view (neighbors, trees, access) and Street View photos of the house.
Roof detail	Maps of pitch, slope direction and height. Lengths of eaves, rakes, ridges, hips and valleys. Every roof plane with its pitch and area. Waste calculation and the suggested waste for this roof.
Roof inspection	Only when the roof has equipment that changes the job: solar panels, turbine vents, pipe boots, box vents, chimneys, skylights.
Materials & estimate	Shingles (bundles), underlayment, drip edge, starter strip, ridge cap, valley flashing. Bundles at each waste level. Your estimate: materials + labor (+ solar and turbines) = total.
Check on site	A checklist before ordering: pitch, layers to tear off, deck condition, flashing and vents, valleys and hips, anything hidden by trees.

A sample QuickSquares report: cover, roof detail, materials & estimate

Suggested waste

The suggested waste is two parts added together: a **cutting** part (more roof planes mean more cuts, hips and valleys) plus an **imagery margin** (lower image quality means a bigger margin). The bundles table marks the suggested column in orange.

Warnings you may see

Warning	What to do
Tree cover	Trees may hide part of the roof, so the real area may be bigger. Confirm on site.
Imagery over 3 years old	Make sure the roof hasn't changed since the photo.
No reliable height data	Area and pitch can't be trusted. Measure on site before ordering anything.
Unusually large area	Check the outline covers only this property, not a neighbor's building.
Google records show more area	Part of the roof may be hidden (usually trees). Confirm the full area on site.
Below 2/12 pitch	That flat area needs a different roofing system, not shingles, and isn't in the squares.
Nearby structure left out	A garage or shed was found but not counted. If it's part of the job, measure again with "Include nearby structures" on.

Always verify on site
Measurements come from satellite and aerial imagery. Quantities are estimates — check them before ordering material.

CHAPTER 5

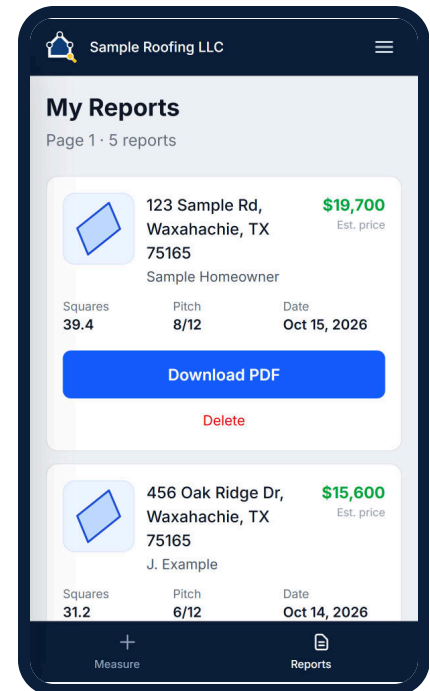

My Reports

Every report you generate is saved here.

Tap **Reports** in the bottom bar. Each report shows the address, homeowner, squares, pitch, estimated price and date.

- **Download PDF** opens the report. **Downloading the same PDF again is free.**
- **Processing** — the report is still being made. Wait a moment.
- **Failed** — something went wrong. The credit comes back to you automatically.
- **Delete** removes a report from your list and its PDF link stops working. **It does not refund the credit it used.**

The Home screen also shows your most recent reports. Tap one to open its PDF.

My Reports

CHAPTER 6

Credits & purchases

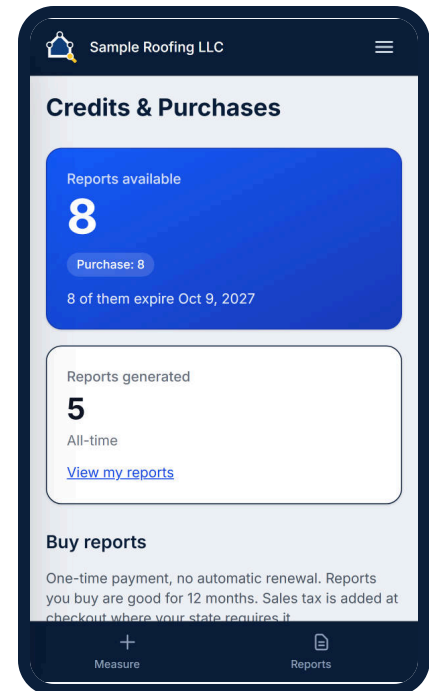

One credit = one roof report.

Open **Credits** from the menu to see:

- **Reports available** and when the next ones expire.
- **Your reports** — each pack you have (Welcome, Purchase, Gift...) and how many are left.
- **Activity** — every report started, generated, or failed with its credit returned.

Buy reports

Pack	Price	Per report
1 report	\$7.00	\$7.00
5 reports	\$29.00	\$5.80
10 reports	\$49.00	\$4.90
20 reports	\$69.00	\$3.45
Unlimited reports	\$74.99 / month	no limit

Credits & Purchases

- **Packs** are a one-time payment, no automatic renewal. Reports you buy are good for **12 months**.
- **Unlimited** has no limit while your plan is active and renews monthly until you cancel. Manage or cancel it from your payment receipt email.
- **Sales tax** is added at checkout where your state requires it. Payment is handled securely by Lemon Squeezy.
- If a report fails, its credit comes back automatically.

CHAPTER 7

Questions & help

Does looking up an address use a credit?

No. Searching and previewing is free. A credit is put on hold when you tap Measure Roof, and only used when you generate the report.

I measured the wrong house. Did I lose a credit?

Not if you tap Cancel before generating — or wait 2 hours — and the credit comes back. Once a report is generated, the credit is used.

The area looks too small.

Usually trees are hiding part of the roof. Measure again and stretch the outline over the hidden parts, and check the warnings on the report.

The garage isn't in my numbers.

Nearby structures are left out by default. Measure again with “Include nearby structures (garage, shed)” turned on.

Can I re-download a report?

Yes, as many times as you want, from My Reports. It's free.

Can I measure the same house again?

Yes. If you measured it in the last 7 days, generating it again is free.

How do I change my company name or phone on the report?

Contact us and we update it for you. You can change your logo yourself in My Company, and your prices in Report Settings.

Need help?

We usually reply within a few hours.

support@spurreport.com

Or open the menu in the app and tap **WhatsApp us** — the message is already typed, you only press send.
